

SAA-TAMPA BAY IMPACT REPORT

OUR LOCAL BENEFICIARY

SUPPORTED SINCE 2018

SWIM ACROSS AMERICA
2023 GRANT AMOUNT
\$100,000

SAA-TAMPA BAY HAS
RAISED OVER
\$2 MILLION
TO FIGHT CANCER
SINCE 2012

Current Grant Recipient

Dr. Jonathan Metts

Research

Dr. Metts is applying a promising immunotherapy study for adults in a pediatric setting for relapsed solid tumors. His research focuses on honing your body's immune system by targeting white blood cells, called tumor infiltrating lymphocytes, to fight your own cancer cells. Ideally, this will result in remission without the use of chemotherapy or radiation.
